Operational

✓ WFP has started the third and last food distribution within its emergency operation to respond to floods in the four most affected departments: Pando, Beni, Cochabamba y La Paz.

✓ WFP prepares the delivery of farming tools to the municipalities of Beni. These will allow communities to prepare the soil for the sowing time. Communal tool kits contain shovels, weeding hoes, machetes, grain sowing devices, wheelbarrows and axes.

✓ The field work of the Emergency Food Security Assessment (EFSA) has been finished in the four flood affected departments. The analysis of the results will help define future actions towards the recovery of the nutritional and food security situation of flood affected people.

Logistics

✓ WFP and VIDECI work together in the implementation of the Logistics Cluster. At the moment, they undertake the monitoring of all items donated to respond to the emergency, updating the system with the support of an external consultant using the LSS SUMA monitoring tool.

✓ A manual for the management of emergency donations and the import of humanitarian items is being drafted.

✓ Given the lack of adequate warehouses for food storage in the department of Pando, with the support of the regional government of Pando and the municipality of Gonzalo Moreno, WFP has been able to install a portable warehouse of 200 square meters, from which to assist, also within its development programme, not only the municipalities of southeast Pando, but also those of northern Beni.

Pictures of the humanitarian response

Cultivation of yuca in the community of San Isidro de la Embocada, municipality of Rurrenabaque, Beni.

Cultivation of pulses in the community of Portachuelo Bajo, municipality of Gonzalo Moreno, Pando.

Cultivation of sugar cane in the community of San Isidro de la Embocada, municipality of Rurrenabaque, Beni.
