From the field...

“We are working in the reconstruction of our houses, since we have been severely affected. We are setting up our community... it is not possible to get things for free... if food aid is coming, we are going to work even more happily and willingly to get our work done. We are highly motivated to work because my partners are demonstrating solidarity to support others. It is impossible to work with hunger, that’s why we want to thank you, because it is with your support that we are soon going to be able to sow again”.

Carmelo Isita, community leader, community of Galilea, municipality of San Borja.
